

Experience

De Anza College Bookstore Employee. Cupertino, CA, March 2019 – Present

I work as an employee at my college bookstore, specifically, I handle anything related to textbook. While I was there, I also decided to propose and implement several ideas, mainly pure software projects, to my supervisor for increased efficiency.

Intern at 12Make Sdn Bhd. Bayan Lepas, Penang, Malaysia, January 2018 - March 2018

Right after high school, one of my friends that I met in a maker event who owns a 3D Printing startup offered me a paid internship at his company. I did a little bit of everything while I was there, ranging from working on projects that were outsourced to us to updating the firmware in several 3D Printers.

This is also where I learnt most of my 3D Modeling skills which can be seen in almost all of my recent videos on YouTube.

Education

B.S. Electrical Engineering, Unknown (Possibly Calpoly/SJSU/UCLA) (Expected 2020-2022)

A.S. for Transfer, De Anza College (2018-2020)
